Agreed. Nothing jumps out as a significant problem to me based on these results.

Hi Tom,

Here is the USGS data from pore water sampling in Haskell Lake. Please let me know if you see anything unusual in this set. I didn't see any levels that indicated levels above low ppb contamination entering the lake, and I believe that only one sample showed anything. As described to me, USGS tried to take the samples where the temp logs showed that groundwater was seeping into the lake bed near shore.

Thanks and have a good weekend.

Bob

Good Afternoon Bob,

Attached is the requested lab report from the porewater sampling, a USGS report is forthcoming.

In the call with the State today you had mentioned that the Analytical Results from Bristol sampling were received and distributed. Could you resend what was distributed, I didn't receive it.

From your reporting, it sounds like there is significant contamination at depth near the lake and that the mid depth source area well is hotter than the shallow and deeper depths.

Also, we would appreciate sharing the anticipated Bristol report with the Tribe before wider distribution.

Kristen,

I will get together with Sherry on Monday and propose some dates/times. She is out this week.

Kristen,

Hi! Bob is off the clock this afternoon. I suggest that we set up a call for when he returns. I am available this afternoon if you want to have a less technical, check in.

Good Afternoon,

Do you have time for a Tribal- EPA call before Bob leaves for vacation. Our last call was the 9th. I thought we had one scheduled on August 23rd, but when I spoke with Bob it wasn't on his schedule. Should we touch base today, our next chance is September 19th.

In the interest of touching bases on all that has been happening, I am certainly willing to sit in a call next week although it isn't the same as having Bob there. I will make time to do this.

Kristen,

I believe that Chris is out today. I am out after noon today until September 19.

If something can be set up for next week, Sherry Kamke may be available to sit in for me, but I do not know her schedule.

Good Afternoon Chris,

I am available for a rescheduled technical call today and all next week. It looks like Bob is out next week though. Do you have time today?

Hi Chris,

We do need to talk if possible. I know that Kristen is in the field today and tomorrow with LIF work. My contractor is waiting for that information to develop some recommendations and we don't have our MiHPT figures back yet.

Can we try to talk to Cascade for their interpretation of the data gathered so far? We will need to think ahead toward remediation and placement of additional wells.

I will be out next week but am here the rest of this week.

Thanks for the reminder.

Bob

Subject: Tower Standard Schedule

Good Afternoon:

I was looking at the proposed schedule that we came up with way back at our Tower Standard meeting in May, and it looks like we're about a month behind where we thought we'd be in terms of evaluating and selecting a remedy. Any suggestions for moving this ahead and getting us back on track?

I know John Robinson sent a message out in late August trying to reschedule our technical group/project management team call that had been originally scheduled for August 25, but it looks like the dates that worked for most respondents have already passed. I think we need to reestablish communications here soon or we could end up losing what's left of this field season.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
